SKILLS

- **Languages:** Python, C++, JavaScript, SQL, HTML, CSS
- **Tools/Platforms:** Power BI, MySQL, MongoDB, Git, Excel, Resend API, Postman
- **Full Stack & Data Science:** React, Node, Express, Python, Pandas, NumPy
- **Core CS:** Data Structures & Algorithms, Operating Systems, Computer Networks
- **Soft Skills:** Problem-Solving, Learning Agility, Critical Thinking, Adaptability

PROJECTS

An E-commerce Website | [GitHub](#)

Jan '26-Present

- Building a production-ready MERN e-commerce platform with responsive UI and modular components architecture while managing version control using Git.
- Creating secure RESTful APIs using Node.js and Express.js for authentication, product catalog, cart, and order workflows with JWT authorization and encryption.
- Architecting a scalable MongoDB database and admin dashboard with role-based access control and full CRUD for products, categories, orders, and users, optimizing performance through Mongoose schemas, indexing, and Postman-tested APIs.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, JavaScript, JWT, Mongoose, Git, REST APIs

Customer Churn Prediction | [GitHub](#)

Jan '26

- Developed a churn prediction model using Python and Random Forest by analyzing telecom customer data through exploratory data analysis, feature engineering, and model evaluation with ROC-AUC.
- Implemented probability-based churn risk classification with threshold tuning to improve recall and identify at-risk customers for early retention.
- Deployed the trained ML model using FastAPI and integrated it with a React frontend to deliver real-time churn predictions through a user-friendly interface.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Random Forest, FastAPI, React, EDA, ROC-AUC

Real-Time Chat System | [GitHub](#)

Jul '25

- Designed and implemented a secure one-to-one real-time messaging system using the MERN stack, delivering a responsive UI and a seamless cross-device user experience.
- Engineered RESTful backend services using Node.js and Express.js, implementing JWT authentication, password hashing, and scalable MongoDB schemas with Mongoose, managed version control using Git and GitHub.
- Enabled low-latency, bidirectional communication using Socket.io, supporting real-time message synchronization and online/offline user status tracking, and deployed the application for reliable production use.
- **Tech Stack:** MongoDB Atlas, Express.js, React.js, Node.js, Mongoose, Tailwind CSS, REST APIs, Socket.io

TRAINING

Full Stack Web Development – Summer Training | [CERTIFICATE](#)

Jul '25

- Completed hands-on training in the MERN stack by building a To-Do List app with user authentication, CRUD operations, and RESTful APIs using MongoDB, Express, React, and Node.js.
- **Tech Stack:** MongoDB, Express.js, React, Node.js, JavaScript, Mongoose, REST APIs.

CERTIFICATES

- A Complete Web Development Course with AI | [CERTIFICATE](#) Jan '26
- NPTEL Elite – Cloud Computing | [CERTIFICATE](#) Apr '25
- Learn Python Programming – Beginner to Master | [CERTIFICATE](#) Mar '24

ACHIEVEMENTS

- Certificate of Participation, **Vibe Code India 2025 Hackathon** Jul '25
- Solved 300+ Data Structures and Algorithms problems in LeetCode and GFG. Present

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering; CGPA: 8.31 Aug '23-Present
- **Modern Public School** Motihari, Bihar
Intermediate; Percentage: 82.6% Mar '21 – Mar '22
- **Jeevan Public School** Motihari, Bihar
Matriculation; Percentage: 88.6% Mar '19 – Mar '20
